

Getting an Estimate

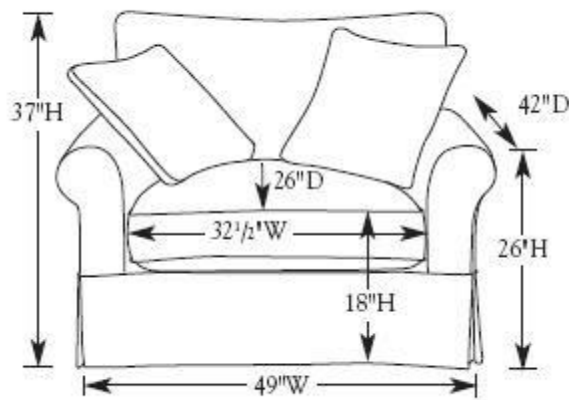

The first step to getting a rough estimate is to describe your project. A picture is the best way to provide the basic details needed for a quick answer on what the price range might be.

Include some basic measurements (**in inches**). If you already have fabric preferences decided, please include that information also:

Length _____ x Height _____ x Depth _____ (front to back)

e-mail your projects picture and measurements to
kjsupholstery@bendbroadband.com

After the rough price range has been established, a more detailed estimate can be given after a few basic measurements are provided:

- A _____ length across front (example-49" W)
- B _____ back height (example-37" H)
- C _____ depth front to back (example-42" D)
- D _____ height floor to top of cushion (example-18" W)
- seat cushion _____ wide (example-32 1/2" W)
- _____ deep front to back x _____ thick
- back cushion _____ wide
- _____ front to back x _____ thick
